Signal and Image Processing for Remote Sensing

Signal and Image Processing for Remote Sensing

Most data from satellites are in image form, thus most books in the remote sensing field deal exclusively with image processing. However, signal processing can contribute significantly in extracting information from the remotely sensed waveforms or time series data. Pioneering the combination of the two processes, **Signal and Image Processing for Remote Sensing** provides a balance between the role of signal processing and image processing in remote sensing.

Featuring contributions from worldwide experts, this book emphasizes mathematical approaches. Divided into two parts, Part I examines signal processing for remote sensing and Part II explores image processing. Not limited to the problems with data from satellite sensors, the book considers other sensors which acquire data remotely, including signals and images from infrasound, seismic, microwave, and satellite sensors. It covers a broader scope of issues in remote sensing information processing than other books in this area.

With rapid technological advances, the mathematical techniques provided will far outlast the sensor, software and hardware technologies. Focusing on methodologies of signal processing and image processing in remote sensing, this book discusses unique techniques for dealing with remote sensing problems.

From reader reviews:

Gloria Robey:

Spent a free time for you to be fun activity to complete! A lot of people spent their free time with their family, or their very own friends. Usually they carrying out activity like watching television, likely to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your free time/ holiday? May be reading a book may be option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to consider look for book, may be the book untitled Signal and Image Processing for Remote Sensing can be good book to read. May be it is usually best activity to you.

Margie Sutton:

Signal and Image Processing for Remote Sensing can be one of your beginning books that are good idea. Many of us recommend that straight away because this e-book has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The author giving his/her effort to put every word into delight arrangement in writing Signal and Image Processing for Remote Sensing nevertheless doesn't forget the main place, giving the reader the hottest and based confirm resource details that maybe you can be considered one of it. This great information may drawn you into fresh stage of crucial contemplating.

Mary McClellan:

Beside this kind of Signal and Image Processing for Remote Sensing in your phone, it can give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh in the oven so don't be worry if you feel like an old people live in narrow community. It is good thing to have Signal and Image Processing for Remote Sensing because this book offers to your account readable information. Do you sometimes have book but you would not get what it's interesting features of. Oh come on, that wil happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. Use you still want to miss the item? Find this book along with read it from at this point!

Jesse Kennedy:

Reading a book make you to get more knowledge from it. You can take knowledge and information from your book. Book is created or printed or created from each source that will filled update of news. In this modern era like today, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just searching for the Signal and Image Processing for Remote Sensing when you needed it?
