Many people seem to be searching for answers to help explain their past, understand their current way of being, and create a happier, more satisfying future. It is the current trend to blame mothers for such emotional problems. *Poppa Psychology* calls into question this habit of blaming mothers, and focuses, instead, on the father-child relationship. Regardless of whether the father is present or absent, his actions will have a direct influence on the child's development.

Fathers have received a great deal of media attention lately, but the main focus has been on their absence. *Poppa Psychology* deals with the psychological ramifications of the father-child relationship, regardless of whether the fathers are present or absent. Specifically, it highlights factors that are related to maladjustment in children and provides suggestions for raising psychologically healthy children.
