Diode Lasers and Photonic Integrated Circuits (Wiley Series in Microwave and Optical Engineering)

Larry A. Coldren, S. W. Corzine

Diode Lasers-An Innovative And Comprehensive Approach. Diode lasers are found in numerous applications in the optoelectronics industry, ranging from readout sources in compact disc players to transmitters for optical fiber communication systems. Diode Lasers and Photonic Integrated Circuits provides a comprehensive treatment of this technology, its principles and theory, treating students as well as experienced engineers to an in-depth exploration of this fast-growing field. Covering material for a two-semester course of graduate- or advanced senior-level study, this innovative book presents the engineering aspects first-introduces all elementary concepts, provides the necessary detail to accurately solve real problems-and then presents complex physical aspects only after a complete understanding of the operation of diode lasers has been achieved. Diode Lasers and Photonic Integrated Circuits includes:

- * Over 270 illustrations
 - * Extensive appendices that provide both review and advanced material, as well as details of derivations
 - * Consistent notation throughout all chapters and appendices that allows for a self-contained treatment and varied levels of study
 - * A series of design examples of relatively complex photonic integrated circuits
 - * Example problems and a toolbox of techniques to apply to new advanced details as they arise
 - * Accurate and consistent calculations that illustrate analysis techniques, while agreeing with experimental data
 - * Complete coverage of matrix multiplication techniques which are more exact, general, and easier to comprehend for modern-day students
- *An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.

From reader reviews:

Theresa Adams:

In this 21st millennium, people become competitive in each way. By being competitive at this point, people have to do something to make these individuals survive, being in the middle of the actual crowded place and notice through surrounding. One thing that at times many people have underestimated the item for a while is reading. Yeah, by reading an e-book your ability to survive rises then having a chance to endure than others is high. To suit your needs who want to start reading any book, we give you this kind of Diode Lasers and Photonic Integrated Circuits (Wiley Series in Microwave and Optical Engineering) book as a starter and daily reading e-book. Why, because this book is usually more than just a book.

Paula Salas:

The guide titled Diode Lasers and Photonic Integrated Circuits (Wiley Series in Microwave and Optical Engineering) is the guide that is recommended to you to learn. You can see the quality of the reserve content that will be shown to you actually. The language that the author uses to explain their ideas is easy to understand. The writer did a lot of study when writing the book, so the information that they share to you is absolutely accurate. You also might get the e-book of Diode Lasers and Photonic Integrated Circuits (Wiley Series in Microwave and Optical Engineering) from the publisher to make you a lot more enjoy free time.

David McCabe:

Is it you actually who have spare time subsequently spend it whole day by means of watching television programs or just lying on the bed? Do you need something new? This Diode Lasers and Photonic Integrated Circuits (Wiley Series in Microwave and Optical Engineering) can be the response, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what do these textbooks have that the others?

Michael Grammer:

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. So you know that little person including reading or as examining become their hobby. You need to understand that reading is very important and book as to be the factor. Book is important thing to include your knowledge, except your own teacher or lecturer. You find good news or update concerning something by book. Many kinds of books that can you choose to adopt be your object. One of them is Diode Lasers and Photonic Integrated Circuits (Wiley Series in Microwave and Optical Engineering).
