Basic Helicopter Aerodynamics (Aerospace Series)

John M. Seddon, Simon Newman

Basic Helicopter Aerodynamics (Aerospace Series) John M. Seddon, Simon Newman

Basic Helicopter Aerodynamics is widely appreciated as an easily accessible, rounded introduction to the first principles of the aerodynamics of helicopter flight. Simon Newman has brought this third edition completely up to date with a full new set of illustrations and imagery. An accompanying website www.wiley.com/go/seddon contains all the calculation files used in the book, problems, solutions, PPT slides and supporting MATLAB® code.

Simon Newman addresses the unique considerations applicable to rotor UAVs and MAVs, and coverage of blade dynamics is expanded to include both flapping, lagging and ground resonance. New material is included on blade tip design, flow characteristics surrounding the rotor in forward flight, tail rotors, brown-out, blade sailing and shipborne operations.

Concentrating on the well-known Sikorsky configuration of single main rotor with tail rotor, early chapters deal with the aerodynamics of the rotor in hover, vertical flight, forward flight and climb. Analysis of these motions is developed to the stage of obtaining the principal results for thrust, power and associated quantities. Later chapters turn to the characteristics of the overall helicopter, its performance, stability and control, and the important field of aerodynamic research is discussed, with some reference also to aerodynamic design practice.

This introductory level treatment to the aerodynamics of helicopter flight will appeal to aircraft design engineers and undergraduate and graduate students in aircraft design, as well as practising engineers looking for an introduction to or refresher course on the subject.

From reader reviews:

Jorge Hinkley:

Inside other case, little persons like to read book Basic Helicopter Aerodynamics (Aerospace Series). You can choose the best book if you love reading a book. As long as we know about how is important any book Basic Helicopter Aerodynamics (Aerospace Series). You can add know-how and of course you can around the world by way of a book. Absolutely right, since from book you can know everything! From your country until eventually foreign or abroad you can be known. About simple matter until wonderful thing you could know that. In this era, we can easily open a book or searching by internet product. It is called e-book. You may use it when you feel fed up to go to the library. Let's read.

Lisa Ayeung:

Book is to be different per grade. Book for children until adult are different content. As it is known to us that book is very important normally. The book Basic Helicopter Aerodynamics (Aerospace Series) ended up being making you to know about other know-how and of course you can take more information. It is extremely advantages for you. The book Basic Helicopter Aerodynamics (Aerospace Series) is not only giving you more new information but also to get your friend when you feel bored. You can spend your current spend time to read your guide. Try to make relationship with the book Basic Helicopter Aerodynamics (Aerospace Series). You never sense lose out for everything when you read some books.

Rhonda Joiner:

Hey guys, do you wants to finds a new book you just read? May be the book with the subject Basic Helicopter Aerodynamics (Aerospace Series) suitable to you? The particular book was written by famous writer in this era. The particular book untitled Basic Helicopter Aerodynamics (Aerospace Series)is a single of several books that everyone read now. That book was inspired a number of people in the world. When you read this book you will enter the new way of measuring that you ever know ahead of. The author explained their concept in the simple way, thus all of people can easily to comprehend the core of this publication. This book will give you a large amount of information about this world now. So you can see the represented of the world in this book.

Jeffrey Messina:

With this era which is the greater man or who has ability in doing something more are more valuable than other. Do you want to become one of it? It is just simple method to have that. What you must do is just spending your time little but quite enough to get a look at some books. One of the books in the top listing in your reading list is definitely Basic Helicopter Aerodynamics (Aerospace Series). This book that is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking upward and review this publication you can get many advantages.
