Changing the World Without Money or God: A Mindful Journey into Consciousness and Free Thought Charles Rentz

SALES and MARKETING Note:

At the end of the description below is a bullet list of why people will purchase this book. This book ALSO has great potential for reaching the international market.

Description of Book and Short Synopsis:

As a rapidly evolving psychological species, the fact is: The human race has reached a tipping point in human consciousness and a time when more people than ever are looking for answers beyond traditional faith based concepts, and distorted governmental solutions. We are beginning to see the folly in our maladaptive coping mechanisms that used to offer comfort from our current individual and collective challenges. Many of us are also tired of making sense of contradictory ideas pervading our society that are leading us astray. In order to make our lives happier and the world a better place, many human beings are passionately seeking new perspectives and solutions to our mutual human endeavors.

Deep within the minds and hearts of more individuals than ever before, (especially our youth), is a deep yearning for higher purpose and need to feel connected with something greater than our own selfish desires. Many of us have emotionally and intellectually evolved to a point where we are looking beyond the outdated ideas of god, and seeking to establish a permanent relationship with our highest conscious self, who strives to bond with the entire human race as a whole. This book offers a means of opening up to oneself, and instills a sense of unity among our species that is much needed in our global culture-we are more alike than we are different.

On earth, where new ideas and solutions are urgently needed and paramount to coexisting peacefully, through a variety of unique insights and examples, and to cultivate truth, I untangle the unconscious nature of our human condition by offering believable 'real life' perspectives on: Psychology, Spirituality, Philosophy, Science and Practical Reality.

During this monumental, yet temporary phase in human evolution, "Changing the World without Money or God" exposes how the vast unconscious nature of the human mind is covertly molding our seemingly self destructive world. My writing also assists in understanding many culturally maladjusted anomalies at a deeply conscious level, and offers viable solutions to our individual and global challenges. This book takes the reader on a mindful journey into modern consciousness and free thought, by which their own conscious awareness will be thrust into an entirely new level of understanding the intricacies of our collective human condition.

Why will readers buy this book?

Humans are ready for a change and know that our current social, religious and governmental systems are damaged and no longer working; this book offers a new way of addressing these divisive collective issues.

Generally speaking, the title and content is controversial and intriguing in nature. The book is written in a very logical manner using real life examples that will deeply resonate with most humans.

Presently, there are more religious AND non-religious people looking for spiritual answers without the dogma of religion; many Christians are seeking answers beyond their fundamental faith, too. Using a new age thought process, this book helps to bridge a much needed gap between the reality of psychology and spirituality.

The content addresses and brings to light that money and 'the god concept' have never realistically solved our individual and collective problems at the core level.

This book speaks of the vital changes that must occur in our collective human consciousness.

I demonstrate that the major problems occurring in the world are merely a temporary phase in human consciousness, and proof things are actually improving on our planet. I also offer real life answers to many questions as to why humans think and act the way we do, and provide solutions to our individual and collective problems.
