Marian Small

Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 Marian Small

In the second book in the *Uncomplicating Mathematics Series*, professional developer Marian Small shows teachers how to uncomplicate the teaching of algebra by focusing on the most important ideas that students need to grasp. Organized by grade level around the Common Core State Standards for Mathematics, Small shares approaches that will lead to a deeper and richer understanding of algebra for both teachers and students. The book opens with a clear discussion of algebraic thinking and current requirements for algebraic understanding within standards-based learning environments. The book then launches with Kindergarten, where the first relevant standard is found in the operations and algebraic thinking domain, and ends with Grade 8, where the focus is on working with linear equations and functions. In each section the relevant standard is presented, followed by a discussion of important underlying ideas associated with that standard, as well as thoughtful, concept-based questions that can be used for classroom instruction, practice, or assessment. Underlying ideas include:

- Background to the mathematics of each relevant standard.
- Suggestions for appropriate representations for specific mathematical ideas.
- Suggestions for explaining ideas to students.
- Cautions about misconceptions or situations to avoid.

The Common Core State Standards for Mathematics challenges students to become mathematical thinkers, not just mathematical “doers.” This resource will be invaluable for pre- and inservice teachers as they prepare themselves to understand and teach algebra with a deep level of understanding.

“*Uncomplicating Algebra* is an excellent resource for teachers responsible for the mathematical education of K–8 students. It is also a valuable tool for the training of preservice teachers of elementary and middle school mathematics.”

—**Carole Greenes**, associate vice provost for STEM education, director of the Practice Research and Innovation in Mathematics Education (PRIME) Center, professor of mathematics education, Arizona State University

“The current climate in North America places a major emphasis on standards, including the Common Core State Standards for Mathematics in the U.S. In many cases, teachers are being asked to teach content with which they themselves struggle. In this book, Dr. Small masterfully breaks down the big ideas of algebraic thinking to assist teachers, math coaches, and preservice teachers—helping them to deepen their own understanding of the mathematics they teach. She describes common error patterns and examines algebraic reasoning from a developmental viewpoint, connecting the dots from kindergarten through grade 8. The book is clearly written, loaded with specific examples, and very timely. I recommend it strongly as a ‘must-read’ for all who are seeking to broaden their understanding of algebra and how to effectively teach this important content area to children.”

—**Daniel J. Brahier**, director, Science and Math Education in ACTION, professor of mathematics education, School of Teaching and Learning, Bowling Green State University

From reader reviews:

Ruben Martin:

The actual book Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 will bring one to the new experience of reading the book. The author style to spell out the idea is very unique. In the event you try to find new book to learn, this book very suited to you. The book Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 is much recommended to you you just read. You can also get the e-book in the official web site, so you can quicker to read the book.

Gena Colgan:

Don't be worry if you are afraid that this book will probably filled the space in your house, you could have it in e-book way, more simple and reachable. This specific Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 can give you a lot of friends because by you taking a look at this one book you have issue that they don't and make an individual more like an interesting person. This kind of book can be one of a step for you to get success. This e-book offer you information that perhaps your friend doesn't realize, by knowing more than additional make you to be great individuals. So , why hesitate? Let us have Uncomplicating Algebra to Meet Common Core Standards in Math, K-8.

Carol Witt:

That publication can make you to feel relax. This particular book Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 was colourful and of course has pictures on the website. As we know that book Uncomplicating Algebra to Meet Common Core Standards in Math, K-8 has many kinds or type. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore , not at all of book usually are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that.

John Dame:

What is your hobby? Have you heard this question when you got scholars? We believe that that query was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you know that little person like reading or as studying become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You get good news or update concerning something by book. Different categories of books that can you go onto be your object. One of them is niagra Uncomplicating Algebra to Meet Common Core Standards in Math, K-8.
