Vilijandas Bagdonavicius, Mikhail Nikulin

Accelerated Life Models: Modeling and Statistical Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) Vilijandas Bagdonavicius, Mikhail Nikulin

The authors of this monograph have developed a large and important class of survival analysis models that generalize most of the existing models. In a unified, systematic presentation, this monograph fully details those models and explores areas of accelerated life testing usually only touched upon in the literature.

Accelerated Life Models: Modeling and Statistical Analysis presents models, methods of data collection, and statistical analysis for failure-time regression data in accelerated life testing and for degradation data with explanatory variables. In addition to the classical results, the authors devote considerable attention to models with time-varying explanatory variables and to methods of semiparametric estimation. They also examine the simultaneous analysis of degradation and failure-time data when the intensities of failure in different modes depend on the level of degradation and the values of explanatory variables.

The authors avoid technical details by explaining the ideas and referring to resources where thorough analysis can be found. Whether used for teaching, research or general reference, Accelerated Life Models: Modeling and Statistical Analysis provides new and known models and modern methods of accelerated life data analysis.

From reader reviews:

Aline Moran:

Have you spare time to get a day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a walk, shopping, or went to often the Mall. How about open or even read a book titled Accelerated Life Models: Modeling and Statistical Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)? Maybe it is being best activity for you. You understand beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with their opinion or you have additional opinion?

Donna Vandyne:

Why? Because this Accelerated Life Models: Modeling and Statistical Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will distress you with the secret that inside. Reading this book beside it was fantastic author who write the book in such wonderful way makes the content inside of easier to understand, entertaining way but still convey the meaning completely. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of positive aspects than the other book include such as help improving your ability and your critical thinking method. So , still want to hesitate having that book? If I had been you I will go to the book store hurriedly.

Neil Dussault:

On this era which is the greater man or woman or who has ability in doing something more are more special than other. Do you want to become considered one of it? It is just simple approach to have that. What you are related is just spending your time little but quite enough to have a look at some books. Among the books in the top record in your reading list is Accelerated Life Models: Modeling and Statistical Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). This book which is qualified as The Hungry Slopes can get you closer in getting precious person. By looking upward and review this reserve you can get many advantages.

Martina Lassiter:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is published or printed or descriptive from each source which filled update of news. On this modern era like now, many ways to get information are available for an individual. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just searching for the Accelerated Life Models: Modeling and Statistical Analysis (Chapman & Hall/CRC

Monographs on Statistics & Applied Probability) when you required it?
