Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series)

Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series)

Mathematical and Analogical Reasoning of Young Learners provides foundational knowledge of the nature, development, and assessment of mathematical and analogical reasoning in young children. Reasoning is fundamental to understanding mathematics and is identified as one of the 10 key standards for school mathematics for the new millennium. The book draws on longitudinal and cross-cultural studies, conducted in the United States and Australia, of children's reasoning development as they progressed from preschool through the end of second grade.

The multifaceted analysis of young children's development of mathematical and analogical reasoning focuses on individual learners, their learning environments, and the interaction between the two. The multidisciplinary team of authors present multiple perspectives and multiple methodologies, and provide valuable information on organizing and sustaining interdisciplinary and cross-cultural inquiry. Key issues addressed include:

- *the relationship between mathematical and analogical reasoning;
- *how changes in children's reasoning relate to the implicit instruction they receive in their classrooms;
- *analyses of the participating teachers' knowledge, beliefs, and practices with respect to mathematical and analogical reasoning of young learners; and
- *ways in which we might promote development of mathematical and analogical reasoning in young children.

This volume is highly relevant for mathematics educators, researchers in mathematics education, educational psychologists, early childhood teachers, and others interested in mathematical development of young children, in particular, the development of their reasoning processes.

From reader reviews:

Allen Brown:

Do you have something that you want such as book? The guide lovers usually prefer to choose book like comic, limited story and the biggest you are novel. Now, why not trying Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series) that give your fun preference will be satisfied through reading this book. Reading practice all over the world can be said as the opportunity for people to know world considerably better then how they react to the world. It can't be stated constantly that reading addiction only for the geeky individual but for all of you who wants to always be success person. So , for every you who want to start examining as your good habit, you may pick Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series) become your own starter.

Lynnette Cash:

This Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series) is great reserve for you because the content that is certainly full of information for you who have always deal with world and have to make decision every minute. That book reveal it information accurately using great coordinate word or we can point out no rambling sentences within it. So if you are read the idea hurriedly you can have whole facts in it. Doesn't mean it only offers you straight forward sentences but difficult core information with lovely delivering sentences. Having Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series) in your hand like having the world in your arm, data in it is not ridiculous one particular. We can say that no reserve that offer you world with ten or fifteen tiny right but this reserve already do that. So , this is good reading book. Hello Mr. and Mrs. hectic do you still doubt which?

Judith Carter:

Do you like reading a publication? Confuse to looking for your chosen book? Or your book has been rare? Why so many concern for the book? But any kind of people feel that they enjoy intended for reading. Some people likes reading through, not only science book but novel and Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series) as well as others sources were given expertise for you. After you know how the fantastic a book, you feel desire to read more and more. Science publication was created for teacher or maybe students especially. Those books are helping them to put their knowledge. In various other case, beside science publication, any other book likes Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series) to make your spare time much more colorful. Many types of book like this one.

Brian Paige:

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information

coming from a book. Book is composed or printed or highlighted from each source in which filled update of news. In this modern era like now, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just in search of the Mathematical and Analogical Reasoning of Young Learners (Studies in Mathematical Thinking and Learning Series) when you desired it?
