Intelligent Broadband Multimedia Networks

Syed V. Ahamed, Victor B. Lawrence

Intelligent Broadband Multimedia Networks Syed V. Ahamed, Victor B. Lawrence
Intelligent Broadband Multimedia Networks is a non-mathematical, but highly systems oriented, coverage of modern intelligent information networks. This volume focuses on the convergence of computers and communications technologies. Most of the concepts that are generic to all intelligent networks, and their microscopic and macroscopic functions, are presented.
This book includes specific architectures that can be used by network designers and planners, telecommunications managers, computer scientists, and telecommunications professionals. The breadth of this coverage and the systems orientation of this work make the text suitable for use in advanced level courses on intelligent communications networks.
The material in this volume ranges from defining intelligent networks to more specific coverage of educational, medical, and knowledge-based networks. Each of the 20 chapters address issues that can help make the transition from computer design, to the underlying concepts of modern telecommunications systems, to considerations necessary for the implementation of intelligent network services. Special and timely coverage of emerging technologies, such as HDSL, ADSL, BISDN, wireless, broadband access, ATM, and other topics, are given expanded treatment. The authors have included design methodologies for installing intelligence into almost any communications systems, and procedures for using such intelligence according to the type of function expected from these networks.
Unique features of the book are:

- a 64-page glossary of key terms (with expanded explanations) used in the field,
- a 23-page index that makes it easy to search for important information,
- running headers on each page to help the busy professional use the book as a reference/design tool,
- complete references including additional reading for more detailed information, and
- accurate and concise information to help telecommunications professionals understand the intricacies of the field.

From reader reviews:

Angela Drew:

As people who live in the actual modest era should be change about what going on or information even knowledge to make these keep up with the era that is certainly always change and move ahead. Some of you maybe can update themselves by looking at books. It is a good choice for you personally but the problems coming to a person is you don't know what type you should start with. This Intelligent Broadband Multimedia Networks is our recommendation so you keep up with the world. Why, since this book serves what you want and want in this era.

Donald Mobley:

Do you one of people who can't read pleasant if the sentence chained within the straightway, hold on guys this specific aren't like that. This Intelligent Broadband Multimedia Networks book is readable by simply you who hate those perfect word style. You will find the info here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to give to you. The writer connected with Intelligent Broadband Multimedia Networks content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the written content but it just different as it. So , do you continue to thinking Intelligent Broadband Multimedia Networks is not loveable to be your top checklist reading book?

Gary Askew:

This Intelligent Broadband Multimedia Networks usually are reliable for you who want to become a successful person, why. The explanation of this Intelligent Broadband Multimedia Networks can be one of many great books you must have will be giving you more than just simple examining food but feed you with information that maybe will shock your before knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed kinds. Beside that this Intelligent Broadband Multimedia Networks forcing you to have an enormous of experience for example rich vocabulary, giving you tryout of critical thinking that we realize it useful in your day task. So , let's have it and revel in reading.

Joseph Mesta:

What is your hobby? Have you heard this question when you got pupils? We believe that that problem was given by teacher to the students. Many kinds of hobby, All people has different hobby. And you also know that little person similar to reading or as reading become their hobby. You have to know that reading is very important along with book as to be the point. Book is important thing to add you knowledge, except your teacher or lecturer. You see good news or update regarding something by book. Amount types of books that can you take to be your object. One of them is this Intelligent Broadband Multimedia Networks.
