Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering)

W Sha, Xiaomin Wu, K G Keong

Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) W Sha, Xiaomin Wu, K G Keong

Unlike electroplating, electroless plating allows uniform deposits of coating materials over all surfaces, regardless of size, shape and electrical conductivity. Electroless copper and nickel-phosphorus deposits provide protective and functional coatings in industries as diverse as electronics, automotive, aerospace and chemical engineering. This book discusses the latest research in electroless depositions.

After an introductory chapter, part one focuses on electroless copper depositions reviewing such areas as surface morphology and residual stress, modelling surface structure, adhesion strength of electroless copper deposit, electrical resistivity and applications of electroless copper deposits. Part two goes on to look at electroless nickel-phosphorus depositions with chapters on the crystallisation of nickel-phosphorus deposits, modelling the thermodynamics and kinetics of crystallisation of nickel-phosphorus deposits, artificial neural network (ANN) modelling of crystallisation temperatures, hardness evolution of nickel-phosphorus deposits and applications of electroless nickel-phosphorus plating.

Written by leading experts in the field Electroless copper and nickel-phosphorus plating: Processing, characterisation and modelling is an invaluable guide for researchers studying electroless deposits or materials science as well as for those working in the chemical, oil and gas, automotive, electronics and aerospace industries.

- Written by leading experts in the field, this important book reviews the deposition process and the key properties of electroless copper and nickel-phosphorus deposits as well as their practical applications
- Chapters review areas such as surface morphology and residual stress, modelling surface structure, crystallisation of nickel-phosphorus deposits and hardness evolution
- An invaluable guide for researchers studying electroless deposits or materials science as well as for those working in the chemical, oil and gas, automotive, electronics and aerospace industries

From reader reviews:

Willette Bickel:

Book will be written, printed, or highlighted for everything. You can know everything you want by a guide. Book has a different type. We all know that that book is important factor to bring us around the world. Next to that you can your reading proficiency was fluently. A guide Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) will make you to end up being smarter. You can feel much more confidence if you can know about everything. But some of you think in which open or reading a new book make you bored. It isn't make you fun. Why they can be thought like that? Have you searching for best book or suitable book with you?

Carrie Hanks:

Reading a book to be new life style in this calendar year; every people loves to read a book. When you study a book you can get a large amount of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you want to get information about your review, you can read education books, but if you want to entertain yourself you are able to a fiction books, these us novel, comics, as well as soon. The Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) provide you with a new experience in studying a book.

Alan Malbrough:

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher with their students. Many kinds of hobby, All people has different hobby. So you know that little person just like reading or as examining become their hobby. You need to know that reading is very important and also book as to be the factor. Book is important thing to add you knowledge, except your own teacher or lecturer. You get good news or update in relation to something by book. Numerous books that can you decide to try be your object. One of them is niagra Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering).

Brenda Hedstrom:

Reading a publication make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is prepared or printed or highlighted from each source this filled update of news. In this modern era like right now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just in search
