Geographers: Biobibliographical Studies, Volume 31 Charles W. J. Withers, Hayden Lorimer
Volume thirty-one of *Geographers: Biobibliographical Studies* brings together nine essays on leading geographers and their work. With its publication, the cumulative record of geographers' lives and works in *GBS* exceeds 460 essays. Here, the editors bring forward critical appraisals of six French geographers, and so illustrate the rich traditions of geographical scholarship in that country; of a leading Portuguese figure; a Briton who played a major role in establishing geography in modern New Zealand; and a British woman who pioneered connections between the history of geography in practice and the histories of science and technology. Geographers' lives and geography's making is wonderfully illuminated in international, national and cross-disciplinary context.
