*Hegel's Moral Corporation* is about two versions of a corporation, one business oriented and dedicated to shareholder-value and profit-maximisation and one dedicated to moral life, Sittlichkeit, in Hegelian terms. In contrast to more general books on management, this book examines one single institution of management, corporations, from the standpoint of a specific philosopher. The book presents somewhat of a critical extension of Hegelian moral philosophy on corporations, reaching well beyond Hegel's outlines of Hegelian corporations in the early 19th century. In other words, it is not Hegelian but Neo-Hegelian in its approach because it does not remain within the confines of Hegel but applies his philosophy to the corporations of the 21st century.
