A History of Transplantation Immunology (Medicine and Dentistry 1995 - 2006: Subject Collection)

Leslie Brent

Those entering the field of transplantation are frequently unaware of the topics historical roots and even of the background on which modern discoveries in tolerance, histocompatibility antigens, and xenotransplantation are based. **A History of Transplantation Immunology** is an account, written by one of the founding fathers of the field, of how tissue and organ transplantation has become one of the most successful branches of late 20th century medicine. The book helps place the work of contemporary scientists into its proper context and makes fascinating reading for immunologists in all stages of their career.

Key Features

- * Describes landmarks in immunology and places them in historical context
- * Beautifully written by one of the founding fathers of the field
- * Portrays the surprising history of events in a colorful and readable manner
- * Contains biographical sketches of some of the pioneers
- * Illustrates the development of key ideas in immunology--tolerance, graft rejection, and transplantation
- * Foreword by Ray Owen
