The Middle East (Routledge Revivals): A Physical, Social and Regional Geography

W. B. Fisher

The Middle East (Routledge Revivals): A Physical, Social and Regional Geography W. B. Fisher

In this comprehensive study, first published in 1950, Professor Fisher examines all the principal elements – physical and human – that influence environment, development and ways of life in the Middle East. An analysis of the physical basis of the region is followed by detailed treatment of the complex human and social aspects; a concluding section brings together, on a regional basis, the elements discussed in the first two parts. With first-hand experience within the Middle East, Fisher presents a detailed and fascinating study, based on surveys and investigations he personally carried out. Including wide-ranging geographical, historical, sociological and political perspectives, this title provides essential background to anyone with an interest in Middle Eastern affairs.
