Networking Security and Standards (The Springer International Series in Engineering and Computer Science) Weidong Kou

Security is the science and technology of secure communications and resource protection from security violation such as unauthorized access and modification. Putting proper security in place gives us many advantages. It lets us exchange confidential information and keep it confidential. We can be sure that a piece of information received has not been changed. Nobody can deny sending or receiving a piece of information. We can control which piece of information can be accessed, and by whom. We can know when a piece of information was accessed, and by whom. Networks and databases are guarded against unauthorized access. We have seen the rapid development of the Internet and also increasing security requirements in information networks, databases, systems, and other information resources. This comprehensive book responds to increasing security needs in the marketplace, and covers networking security and standards. There are three types of readers who are interested in security: non-technical readers, general technical readers who do not implement security, and technical readers who actually implement security. This book serves all three by providing a comprehensive explanation of fundamental issues of networking security, concept and principle of security standards, and a description of some emerging security technologies. The approach is to answer the following questions: 1. What are common security problems and how can we address them? 2. What are the algorithms, standards, and technologies that can solve common security problems? 3.

From reader reviews:

John Alfaro:

Nowadays reading books become more and more than want or need but also become a life style. This reading behavior give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The data you get based on what kind of book you read, if you want get more knowledge just go with schooling books but if you want truly feel happy read one having theme for entertaining including comic or novel. The actual Networking Security and Standards (The Springer International Series in Engineering and Computer Science) is kind of e-book which is giving the reader unforeseen experience.

Thomas Woods:

A lot of people always spent their very own free time to vacation or even go to the outside with them household or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, or playing video games all day long. If you need to try to find a new activity this is look different you can read some sort of book. It is really fun for yourself. If you enjoy the book that you just read you can spent the entire day to reading a guide. The book Networking Security and Standards (The Springer International Series in Engineering and Computer Science) it doesn't matter what good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to develop this book you can buy often the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not very costly but this book features high quality.

Latoya Brown:

People live in this new day time of lifestyle always try to and must have the spare time or they will get large amount of stress from both day to day life and work. So , when we ask do people have extra time, we will say absolutely indeed. People is human not just a robot. Then we request again, what kind of activity have you got when the spare time coming to an individual of course your answer can unlimited right. Then ever try this one, reading publications. It can be your alternative with spending your spare time, the actual book you have read is actually Networking Security and Standards (The Springer International Series in Engineering and Computer Science).

Joseph Haner:

Playing with family in the park, coming to see the marine world or hanging out with good friends is thing that usually you will have done when you have spare time, then why you don't try point that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Networking Security and Standards (The Springer International Series in Engineering and Computer Science), you may enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang-out type is it? Oh occur its mind

hangout fellas. What? Still don't buy it, oh come on its called reading friends.
